

## Waterfall Model

- It is a **Step By Step implementation** of SDLC.
- **Duration** of waterfall model is approx **3 Months**
- **Requirements** are **fixed** for this model, We don't accept any new requirement once the development begins.
- In Waterfall model without completing one step we can not proceed to the next step. Also, We can't revert back to the Previous Stage.
- If any Issue/Defect found while testing, We fixed it into the Next Release.
- It is the **Plan-Driven approach**.

Plan-Driven Approach	Value-Driven Approach
<b>Requirements</b> are <b>Fixed</b>	<b>Requirements</b> May <b>Vary</b>
Stick to the Plan	Continuous Learning and Planning
Success is to meet the Plan	Success is to deliver requirements as early as possible
<b>Long</b> Development Time	<b>Short</b> Development Time
Development Type- <b>Linear</b>	Development Type- <b>Non-Linear</b>
<b>Delivered Fixed Scope</b>	<b>Allow Scope to change</b> (in Change Request case)

**TASK: Difference Between Verification and Validation and. Quality Of Good Tester**
